Daniel Nguyen
Richardson, TX | daniel.nguyen.2345@gmail.com

EXECUTIVE SUMMARY

Motivated Computer Science graduate with a strong foundation in software development, programming, and database systems. Proficient in Java, Python, SQL, and RESTful APIs, with experience building and streamlining applications using current development tools and Agile methodologies. Experienced in working with structured data formats including JSON and XML. Adept at problem solving, writing clear and efficient code, and excellent communication skills. Eager to tackle difficult problems and discover new AI-driven solutions.

EDUCATION

The University of Texas at Dallas December 2024
Bachelor of Science, Computer Science **GPA 3.500**

The University of Texas at Dallas February 2025- December 2027
Master of Science, Software Engineering

SKILLS

Languages: Python, Java, JavaScript, SQL, HTML/CSS
Software Engineering: Object-Oriented Programming (OOP), Data Structures & Algorithms, RESTful API Development, SDLC, Agile, Integration Testing
Frameworks & Libraries: React, TensorFlow, PyTorch, scikit-learn, MediaPipe, Pandas, NumPy
Databases: MySQL, Oracle
Design & Architecture: UML (Class, Sequence), ER/EER Modeling, Database Design
Cloud & Tools: AWS, Docker, Git, Linux, Unix

PROFESSIONAL EXPERIENCE

Ridge Commons Family Dentistry August 2021 – Current

- Experience in service order requests from the dentist and preparing specifications for purchase and equipment orders.
- Maintain an efficient workflow by scheduling, breaking down insurance, and addressing any customer concerns.
- Collaborated with other staff to make sure equipment is stocked daily along with providing the necessary equipment for a procedure.

ACADEMIC EXPERIENCE

Tennis Training Application March 2025 - Current

- Developed an LSTM-based model to detect tennis split-step movements from **MediaPipe pose landmarks**, achieving **90% recall and 80% precision on a held-out test set**.
- Built a **Python video-processing pipeline** using threading and queues to process tennis footage, extract MediaPipe pose data, and analyze a sparse dataset for supervised model training.
- Containerized the application using **Docker** to enable consistent deployment and execution on servers.

Software Engineering March - May 2025

- Led a team to model real world problems like a library rental using Domain Model and Sequence Diagrams.
- Met project deadlines during SCRUM meetings and have lots of experience with Iterative and AGILE methodology.
- Responsible for setting up and leading Sprint meetings to make sure that current deliverables will meet project standards/deadlines

Introduction to Machine Learning March – May 2023

- Applied various image recognition techniques to accurately identify over 94% of images, improving classification performance inside the ResNet Image Recognition project.
- Partnered with 3 others to research and implement advanced neural network architectures, including CNNs, ResNets, and RNNs, to solve complex machine learning problems.

COMMUNITY SERVICE

North Texas Food Bank, Plano, TX 75075 August 2020 – Current
